

Empalis Backup Service on demand

We are there when your resources run out

Backup on demand: fast, competent, reliant

Unusual times require unusual actions. In case of a disaster you are faced with the challenge of expanding and converting your IT quickly and comprehensively. Deploy new workstations, reinstate connections and hardware or completely switch to a new location. This ties up valuable resources and time.

So that you don't have to worry about the administration of your Backup landscape, we have developed a special service offer for you. Based on our many years of extensive experience in Backup and adapted to the current situation: immediately available and at a fair price.

Service on demand

- Daily monitoring of the Backup servers
- Daily status mail with detected problems
- 10 service hours for trouble-shooting IBM Spectrum Protect
- Predatar Insights with selected monitoring & reporting features

2.500 Euro/Month

Operation on demand
